Subject: A Laser safety training, January 2021

Dear all,

The Safety and Radiation Protection Unit will perform an additional Laser Safety training during January 2021.

The training will be conducted according to the Covid19 Technion regulations. Please notice that registration in advance is mandatory. Upon registration we will provide more information about the upcoming training, including a ZOOM link or Moodle orientation.

Time and location:

**Basic laser safety training**- January 11 @ 9:00-12:00.
The training is mandatory for researchers, employees and graduate students who intend to use 3B and 4 class laser systems.

**Refresher Laser training**- January 13 @ 9:00-10:30.
The training is mandatory once a year for researchers, employees and graduate students who intend to use 3B and 4 class laser systems and already participated in a basic laser safety training.

Please register in advance using this link.

Keep up the safe work,

Safety Unit
