

Walking

- Be cautious around open pits that are improperly fenced.

Notify the Safety Unit.

-  Do not step over equipment or pallets on the floor.
- Do not walk beneath a beam or loaded crane.
- Do not walk or stand between cars or forklifts and a wall.
- If you see an obstacle – tools, pole, roll, rag, etc. – remove it and place it in a place where it will not be an obstacle and cause an accident.
- Shortcuts are always dangerous. Always walk on the designated path, even if it seems to be longer.
- Keep away from unfamiliar places where your presence is not necessary.
- Keep away from places where welding or sharpening is underway, from places that produce sparks, dust, chips, etc., **and from places where work in general and construction in particular are underway.**
